

DWR-Round

Semi-Automatic Bottle Labeller

professional, cost-effective labelling

The Martek DWR-Round system provides a professional solution for labelling cylindrical products including bottles, jars, cans, pots and tubes for a fraction of the price of an inline labeller.

Products from 20 to 130mm diameter can be labelled with labels from 15 to 200mm high.

Options include Smart-Jet printer to add variable data to labels before they are applied, clear label sensor and registration sensors for applying multiple labels.

Clear label sensor

The optional ultrasonic label sensor allows clear and translucent labels to be applied as well as opaque labels. Should your requirements change, the ultrasonic label sensor can be retro-fitted.

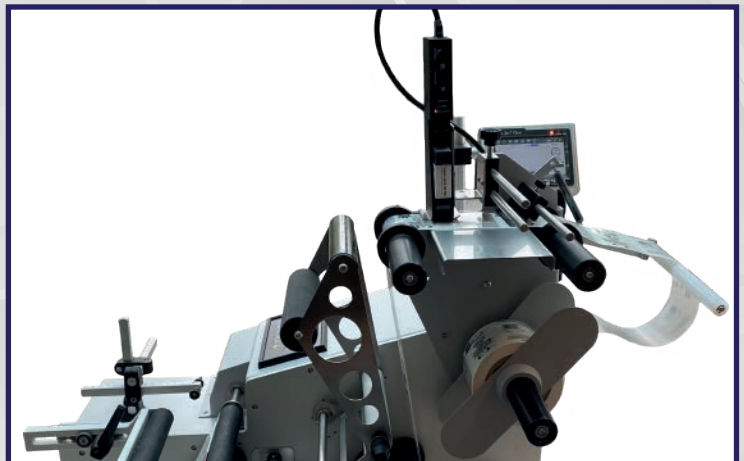

Electronic control panel

Settings for up to 40 different products can be stored on the DWR-Round's control panel for quick recall. Simple mechanical adjustments allow quick changeover between different products.

Apply multiple labels

The DWR-Round can apply front and back labels from the same label roll (alternate label) and automatically space labels as required. Optional registration sensors can be used to apply labels in registration to other labels of product features.

Inkjet printer options

A choice of Smart-Jet and REINER jetStamp inkjet coders can be fitted to the DWR-Round to overprint labels before they are applied. Text, graphics, barcodes and 2D codes can be printed along or across labels depending on the printer model.

Specifications	DWR-Round 200	DWR-Round 200
Product diameter:	20 to 130mm	20 to 130mm
Label width:	15 to 200mm	15 to 300mm
Label length:	15 to 600mm	15 to 600mm
Label roll diameter:	300mm	300mm
Label roll core size:	38 to 76mm	38 to 76mm
Application speed:	4 to 20m/min	4 to 20m/min
Throughput:	Up to 20 products / min	Up to 20 products / min
Electrical input:	230-240Vac @ 50Hz, 200W	230-240Vac @ 50Hz, 200W
Dimensions:	783 x 497 x 516H mm	783 x 600 x 516H mm
Weight:	36Kg	40Kg
Options:	Ultrasonic sensor for clear labels, inkjet coder, label registration sensor
