GoDEX AG1000F Series
Round Product Labellers

MARTEK Industries

professional labelling...
## ...on a budget

Print labels and automatically wrap around cylindrical products including bottles, jars, tins and pots with the same professional results as an inline labeller... for a fraction of the price.

Bottles, jars, tins, pots, tubes... label any cylindrical product from 20 to 120mm diameter efficiently and accurately. Simply place the product on the drive rollers and lower the smoothing roller to start labelling.

versatile range

The AG1000F system can be used to apply labels up to 118mm wide (height on bottle) with print resolution of 200, 300 or 600dpi using a GoDEX ZX1000i series printer.
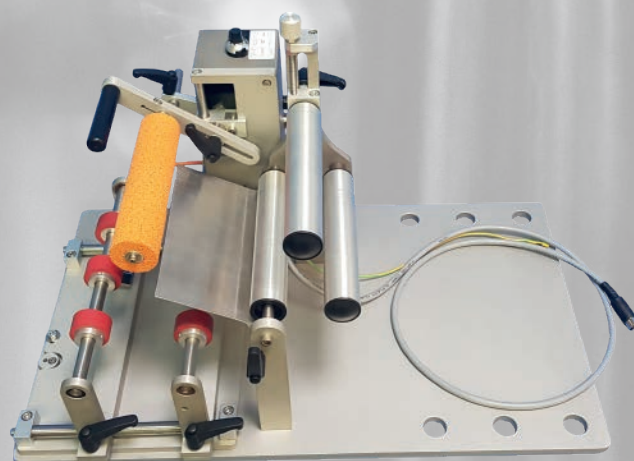

For larger labels, the AG1060F can be used to apply labels up to 178mm wide with a print resolution of 200 or 300dpi using a GoDEX EZ6000i series printer.

features and options

Rims, lids and lips can be easily accommodated by moving the drive rollers to position where they are avoided.

For labelling shallow pots and tins, the optional side support pin or funnel plates can be added to keep the product correctly aligned.

For bottles requiring front-and-back labels to be evenly spaced, the optional regitration sensor can be used to detect the position of the first label and automatically apply the second label in the correct position.

Specification	AG1000F	AG1060F
Printer:	GoDEX ZX1200i, ZX1300i or ZX1600i	GoDEX EZ6250i or EZ6350i
Print method:	Thermal transfer or direct thermal	Thermal transfer or direct thermal
Print resolution:	200, 300 or 600dpi	200 or 300dpi
Label width:	25 to 118mm (height on product)	50 to 178mm (height on product)
Product diameter:	20 to 120mm	20 to 120mm
Label wrap speed:	50 to 100mm/sec	50 to 100mm/sec
Dimensions LxWxH:	800-940 x 350 x 330mm including printer	850-990 x 350 x 330mm including printer
Weight:	8Kg excluding printer / 22Kg including printer	8Kg excluding printer / 25Kg including printer
Standard interfaces:	Ethernet, USB and serial	Ethernet, USB and serial
Optional interfaces:	WiFi, Bluetooth and parallel	Parallel
Warranty:	3 years	Applicator 3 years / printer 5 years
Options:	Suport pin or funnel for narrow products, registration for front-back labelling, stand-alone kit for operation without a PC connected, various software options (GoLabel included free-of-charge).
